

# REMOTE ALS OUTCOME MEASURE STUDY

EMORY UNIVERSITY  
ATLANTA, GA

---

## RASCH-BUILT OUTCOME MEASURES TO IMPROVE ALS CLINICAL TRIALS

### What is Required:

Study participants will complete questionnaires on the computer about their ALS (the ROADS and the ALSFRS-R) every month for a minimum of 6 months. Participants will also complete questionnaires 1 time by phone. Participants will also have a minimum of 2 neurologic exams by video teleconference to validate a new telemedicine neurologic exam scale. **No in-person visits are required.** This study is not expected to benefit participants directly, but we hope this research will allow us to conduct more effective ALS research studies in the future.

### Purpose of the Study?

The goal of this study is to develop and validate better scales for tracking ALS progression with the hopes that these tools can lead to faster, more efficient, and more decisive ALS clinical trials in the future.

---

### Who is Eligible?

Adults with a diagnosis of ALS (or ALS variants including PLS and PMA)  
Anywhere in the United States
